

Take a Walk Through Upper Watts Branch Park

Hear about our efforts to restore this important stream valley and learn why tree removals are required.

Join us **6-7:30 p.m. on Wednesday, March 26**, at the Fordham Road and Princeton Place intersection, and **6-7:30 p.m. on Thursday, March 27**, at the dead end on Azalea Drive.

**Upper Watts Branch Park Forest Preserve
Environmental Restoration Project**

Wednesday, March 26, at 6-7:30 p.m.

Beginning at the intersection of Fordham Road and Princeton Place, the walk will proceed down a 600-foot stretch of stream and on to the Princeton Place outfall.

Thursday, March 27, 6-7:30 p.m.

Beginning at the dead end on Azalea Drive, the walk will proceed to the stream, then on to an exposed sanitary sewer manhole and finally on to the Aster Boulevard outfall.

The City of Rockville and its environmental consultants will lead walks through the Upper Watts Branch Park Forest Preserve to tour recommended repair sites and get community input on the [Upper Watts Branch Park Forest Preserve Environmental Restoration Project](#).

The tours will visit six recommended repair sites (three stream sites and three storm drain outfalls). A day or two before the tours, crews will mark the construction access routes with orange pin flags. Trees identified for removal will be marked with blue flags or ribbons.
