Ms. Cecilia Lane,

I just entered the BUBBAs contest a few minutes ago. I typed in the Runoff Volume Treated as 25 CF (first 0.5" of runoff). However, I see from my confirmation that the computer interpreted that to mean 250.5 cf. Maybe if I expanded my BMP it could do that, but right now that is a bit ambitious. When you get an opportunity, please revise my entry to Volume Treated = 25 cf.

Thanks very much,
Brian Lundstrom

PS Thanks very much for sponsoring the contest! It has been great fun to craft an entry.
